Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear if the driving means is a motor or a power spring type motor. It appears that lines 4 and 5 of the claim are redundant of line 2. It is not clear if the "toy main body" is the same as the biped toy as claimed in line 1. It is not clear if the foot portions are positioned in the lower of the torso. It appears that the foot portions are attached to the leg portions. It is not clear if the first link member is of apart of one or all of the leg portions. It appears from the specification that the first link member is of one of the leg portion. It is not clear if the second link mechanism is of the foot portions. It appears from the figure 2 of the claimed invention and page 5 of the specification that the second link mechanism is of the left leg portion 4A. in claim 1, lines 13-16 is confusing.

Regarding claim 2, it is not clear as to what is meant by the phrase "two assist cam".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/682,476
Art Unit: 3712

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by
Onishi et al.

Regarding claim 1, as best as understood, Onishi teaches in the figures leg portions (fig.2), a motor drive means (p. 4, under "[0030]"), foot portions (8), a first link member (fig.11), and a second link mechanism (fig.11). Also see pages 5 and 6 of Sega Toys.

Regarding claim 2, as best as understood, Onishi further teaches two assist cams (12a, 12b).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mikolasek teaches a toy. Morgrey teaches a remote controlled, multi-legged walking robot. Rankin et al teaches a reconfigurable animal figure toy glider. Miller teaches a reconfigurable toy glider.
